Digital Signage involves the remote-controlled distribution and playback of digital content such as TV programs, advertisements, menus, and various forms of information - on networks displays. These displays can range from large digital billboards to smaller screens, either at a single location or across multiple sites. The goal is to target the audience with relevant information.

Assured Digital Signage has showcased a Digital Signage application on the Android platform. This application features the ability to update content remotely via a web browser, and supports the playback of video content, images, HTML web pages, and scrolling text messages.
