

Digital signage refers to the remote management and playback of digital content, such as TV programs, advertisements, menus, or other types of information, across a network of screens. These screens can range from large digital billboards to smaller displays, located either at a single site or across multiple locations. The goal is to deliver targeted, dynamic messages to the right audience at the right time.

Assured Digital Signage has developed a digital signage application for the Android platform. This innovative solution allows users to remotely update content via a web browser and supports the playback of videos, images, HTML web pages, and scrolling text messages. It's a powerful tool for delivering engaging and customizable content with ease and flexibility.

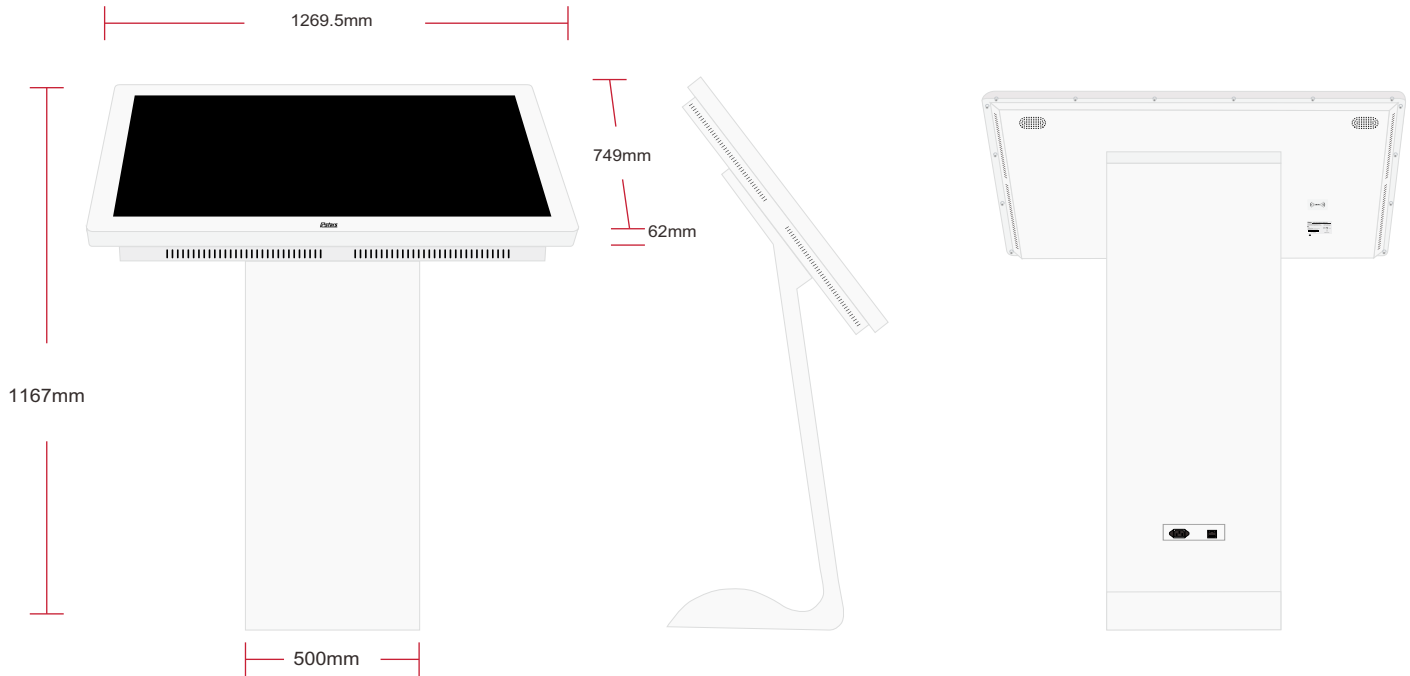

Key Features:

- Android 8.1/9.0/11 operating system
- RK3399, Dual-core Cortex-A72, 1.8GHz
- 2/4GB DDR3 + 8/16/32 GB Flash
- 802.11a/b/g/n/ac internal Wifi
- 4G/WIFI/WLAN Network connection
- Remote Management Software
- Landscape display mode
- 1080P Display output
- Capacitive touch/IR touch screen optional

Designed for:

- POS
- Hotel
- Self-service Terminal
- Public Information Display
- Hospitality
- In-vehicles And Transportation

SVRCS-550CZAZ
